

# THERMON PRODUCT LIFECYCLE ANNOUNCEMENT

END-OF-LIFE AND END-OF-SALE FOR THERMON TC101, TC201, TC202, AND TC365 TEMPERATURE CONTROL AND MONITORING MODULES

**February 4, 2026**

Thermon announces the end-of-life and end-of-sale for the TC101, TC201, TC202, and TC365 temperature control and monitoring modules. These microprocessor-based controllers were discontinued several years ago and have since been superseded by modern digital control platforms that provide enhanced functionality, improved reliability, and long-term component support. This notice serves to formally document the obsolescence of these legacy products.

## Product Transition Information

Depending on specific design requirements and system architecture, Thermon offers a range of modern control and monitoring platforms suitable for replacing TC101, TC201, TC202, and TC365. Please consult Product Management or your local Thermon representative for guidance on selecting appropriate replacement solutions based on application needs and system configuration.
