Terminator™ ZP
Power Connection Kit

INSTALLATION PROCEDURES

For Power Connection, In-Line Splice Connection, T-Splice Connection, or End Termination Applications

THERMON®
The Heat Tracing Specialists®
Terminator™ ZP

Receiving, Storing and Handling . . .

1. Inspect materials for damage incurred during shipping.
2. Report damages to the carrier for settlement.
3. Identify parts against the packing list to ensure the proper type and quantity has been received.
4. Store in a dry location.

Kit Contents . . .

Kit Contents

1. Expediter Assembly
   - Support Cap with O-Ring
   - Threaded Grommet Compressor
   - Grommet
   - Support Base with O-Ring
2. Junction Box Lid
3. Junction Box Base with O-Ring
4. Nut
5. Banding
6. Banding Guide
7. Terminal Blocks with DIN Rail
   (Refer to terminal specifications for maximum allowable wire size)
8. Junction Box Cord

Order Separately . . .

PETK Power and End Termination Kits (per cable)

PETK-1 for BSX, RSX, VSX
PETK-2 for KSX, HTSX
PETK-3 for HPT, FP

Order Separately

- RTV Tube
- Power Connection Boot
- End Cap
- Tape Strip 6” (PETK-3 only)
- End Termination Caution Label
- GRW-G Grommet (PETK-3 only)
- Ground Sleeve

Dimensions . . .

Installation Precautions . . .

- To minimize the potential for arcing and fire caused by product damage or improper installation use ground-fault protection. The National Electrical Code (NEC) and Canadian Electrical Code (CEC) require ground-fault protection of equipment for each branch circuit supplying electric heat tracing.
- Installation must comply with Thermon requirements and be installed in accordance with the NEC, CEC, or any other applicable national and local codes.
- Component approvals and performance ratings are based on the use of Thermon specified parts only. User supplied power connection fittings must be listed or certified for intended use.
- Avoid electrostatic charge. Clean only with a damp cloth.
- De-energize all power sources before opening enclosure.
- Keep ends of heating cable and kit components dry before and during installation.
- Individuals installing these products are responsible for complying with all applicable safety and health guidelines. Proper personal protective equipment, or PPE, should be utilized during installation. Contact Thermon if you have any additional questions.

Tools Required . . .

Certifications/Approvals . . .

- IP66/Type 4X -60°C ≤ Ta ≤ +55°C
- Listed Heat Tracing Cable System 137M
- Ordinary & Hazardous Locations
  - Class I, Division 2, Groups A, B, C, & D
  - Class II, Division 2, Groups F & G, Class III
  - Class I, Zone 1, Ex eb IIC T4-T6
  - FMG 10.0022X Ex eb IIC T4-T6, Ex tb IIIC T135°C-T85°C
  - Ex II 2 GD Ex eb IIC T4-T6, Ex tb IIIIC T135°C-T85°C FM 10ATEX0058X
1. Locate bus connection (HPT and FP only) and cable as shown. Cut end of cable at angle to aid in piercing grommet. Leave additional cable for expansion loop. See page 5 for multiple cable installation tips.

2. Insert cable into expediter. If mounted on bottom or side of pipe, punch out weep hole. Note: For HPT and FP cable, exchange grommet in Terminator with GRW-G provided in PETK 3.

3. Slide expediter toward pipe and route cable through support base entry.

4. Insert banding guide into expediter and snap into place.

5. Mount expediter to pipe using pipe band. Do not band over cable.

6. Cut off end of cable.

7. Terminate cable with appropriate PETK termination kit. Refer to PETK installation instructions.

8. Push excess cable back through expediter. Tighten cap securely. Tape cable expansion loop to pipe.

9. For power connection applications: Use dimple molded into side of junction box base to locate center of hole, drill for user supplied power connection fittings per manufacturer’s recommendations.
10. Mount junction box base on expediter. Make sure to align slots to properly orient junction box base. Tighten nut securely.

11. For power connection applications: Install power connection fittings (user supplied) and pull in power and ground wires.

12. Install quick mount terminal blocks.

13. Complete system wiring. Refer to typical wiring details on page 5. Tighten terminal screws to a minimum torque value of 1.5 Nm (13.3 lb-in).

14. Install junction box lid and twist hand tight. Insert screwdriver into ratchet slots located on side of junction box base.

15. Use screwdriver to ratchet on junction box lid. Lid will rotate 30 degrees.

16. Lid latch mechanism fully engaged. To remove lid, repeat steps 14 and 15 but in the opposite direction.
**Terminator™ ZP**  

**Two Cable Layout Tips**

- Locate bus connection (HPT and FP only) and cable as shown. Cut end of cable at angle to aid in piercing grommet. Leave additional cable for expansion loop.
- Insert two cables into expeditor.  
  **Note:** For HPT and FP cable, exchange grommet in Terminator with GRW-G provided in PETK-3.

**Three Cable Layout Tips**

- Locate bus connection (HPT and FP only) and cable as shown. Cut end of cable at angle to aid in piercing grommet. Leave additional cable for expansion loop.
- Insert three cables into expeditor.  
  **Note:** For HPT and FP cable, exchange grommet in Terminator with GRW-G provided in PETK-3.
- Mount expeditor with three cables. Do not band over cable.

**Typical Wiring Details**

- **Power Connection (1 to 3 Cables).** For 3 cable power connections, additional terminal blocks will be required when using 10mm² (#8 AWG) power supply wiring.
- **In-Line Splice and T-Splice**
- **End Termination (1 to 2 Heating Cables).** Remove jumpers for 2 cable terminations.
