**PRODUCT SPECIFICATIONS**

**Systems Accessories**

**THERMON HEAT TRACING CABLES**

**TERMINATOR™ NONMETALIC POWER CONNECTION, SPLICE AND END-OF-CIRCUIT LIGHT KITS**

Terminator nonmetallic accessories are approved for ordinary and Division 2 hazardous locations. Terminator ZP, ZS/ZE, ZE-B, and ZL kits certified as Ex e II are also available. The kits have a maximum pipe exposure temperature rating of 482°F (250°C) with a minimum installation temperature of -76°F (-60°C).

*Terminator DP/ZP* is designed to fabricate power connections, in-line/T-splice connections or for making end terminations. Electrical connections are made in terminal blocks utilizing nickel-plated copper terminals to ensure corrosion-free electrical integrity. The up front positioning of the terminal block permits easy access during termination and for future routine maintenance.

The Terminator DP/ZP kit includes: Type 4X junction box with integral gasket, three-point DIN mount terminal block with nickel-plated copper terminals (600 V, 50 A), pipe-mounted fitting, stainless steel pipe attachment band for piping 10” or less. (PETK/SCTK termination kit required, order separately)

**Terminator DS/DE and ZS/ZE** are designed to fabricate in-line splices or end terminations. **Terminator DE-B and ZE-B** are designed to provide visual indication of an energized heating circuit.

Electrical connections are made using wire fasteners. Once the kit is assembled, a tool is required to remove the cover to gain access for maintenance or testing. (For applications requiring terminations to be made with terminal block connections, the Terminator DP or DL kit may be used.)

The Terminator DS/DE, ZS/ZE and DE-B, ZE-B kits include: Type 4X pipe-mounted fitting with locking splice cover, stainless steel pipe attachment band for piping 10” or less. (PETK/SCTK termination kit required, order separately)

**Terminator DL and ZL** are designed to provide visual indication of an energized heating circuit. The kit may be utilized as a power connection or an end termination kit. Electrical connections are made in terminal blocks utilizing nickel-plated copper terminals to ensure corrosion-free electrical integrity.

The Terminator DL and ZL kit includes: Type 4X junction box, yellow raised light, diode indicating lamp can be energized with up to 254 Vac without change in luminosity, three-point DIN mount terminal block with nickel-plated copper terminals, pipe-mounted fitting, stainless steel pipe attachment band for piping 10” or less. (PETK termination kit required, order separately)

**TRACEPLUS™ NONMETALIC KITS**

Approved for ordinary and Division 2 hazardous locations.

Max. Exposure Temp. 400°F (204°C)
Min. Installation Temp. of -20°F (-29°C)

**PCA** is designed to fabricate power connections, in-line/T-splice connections or for making end terminations.

The PCA kit includes: Type 4X junction box, pipe-mounted expediter, 2 stainless steel pipe attachment bands for piping 10” or less. (PETK/SCTK termination kit required, order separately)

**Terminator PCA-H** ..................... BSX, HTSX, USX, HPT, FP
**PCA-V** ....................................... RSX, VSX-HT

CABLE END TERMINATION KITS, ATTACHMENT TAPES AND MISCELLANEOUS ITEMS

PETK circuit fabrication kit includes a power boot, end cap, RTV adhesive.

SCTK splice connection/termination kit includes power boots, wirenuts, RTV adhesive.

PETK-1D / SCTK-1D .................................. BSX, RSX, VSX-HT
PETK-2D / SCTK-2D .................................. KSX, HTSX, USX
PETK-3D / SCTK-3D .................................. FP, HPT

CL vinyl-based peel and stick caution labels are intended for direct exposure to industrial environments. Electrically heated pipelines and vessels are to be clearly identified at frequent intervals. Caution labels should be placed at 10'-20' (3-6 m) intervals or as required by code or specification.

B-4, B-10, B-21 stainless steel attachment bands for securing Thermon connection kits to pipes.

B-4 for pipes up to 4" (100 mm) diameter
B-10 for pipes up to 10" (250 mm) diameter
B-21 for pipes up to 21" (530 mm) diameter

ET-6C, ET-8C end termination kits are designed to properly terminate the end (away from power) of a heat tracing circuit. Each kit includes a rubber end cap, RTV adhesive and caution label.

ET-6C ............................................. BSX, RSX, VSX-HT
ET-8C ............................................. HTSX, KSX, USX FP & HPT (OJ)

FT-1L, FT-1H fixing tapes for attaching heating cable to piping every 12" (30 cm) or as required by code or specification.

AL-20L, AL-20H, AL-30L, AL-30H aluminum tape for continuous (longitudinal) covering.
