T-802 is a two-part medium temperature resin-based heat transfer compound for use in moist and/or corrosive environments. Thermon’s heat transfer compounds provide an efficient thermal connection between the tracer and the process equipment. By eliminating the air voids that would ordinarily exist, heat is directed into the pipe wall primarily through conduction rather than convection and radiation. A single tracer utilizing Thermon’s heat transfer compound has the equivalent performance of three to five air convection (bare) tracers.

T-802 is typically utilized for applications requiring relatively short curing times where steam is not currently available. T-802 begins curing upon mixing. Curing times vary from 1.25 to 4 hours depending on mixing ratios and ambient temperatures.

**SPECIFICATIONS/RATINGS**

**Container sizes**
- T-802-Q ..................... 1-quart (0.946-liter) cans
- T-802-G ..................... 1-gallon (3.79-liter) cans

**Maximum exposure temperature** ........................................ 275°F (135°C)
**Minimum exposure temperature** ......................................... -320°F (-196°C)
**Minimum installation temperature** ....................................... 32°F (0°C)
**Heat transfer coefficient, U** .............................................. 20-40 Btu/hr•°F•ft² (114-227 w/m²•°C)
**Electrical resistivity** ....................................................... 146 ohms/inch (57 ohms/cm)
**Shelf life** ........................................................................... 1 year (unmixed)
**Bond shear** ........................................................................ 1,000 lbs/in² (6,895 kPa)
**Water-soluble** .................................................................... no

**DESCRIPTION**

T-802 is available in 1-quart (0.946-liter) and 1-gallon (3.79-liter) cans.

**BENEFITS**

- Nonsoluble in water
- Self-curing—no heat required
- Epoxy resin base creates strong thermal and mechanical bond
- Suitable for moist and/or corrosive environments
- Free design assistance
TYPICAL STEAM TRACING SYSTEM

* Shipped in two (2) separate containers.

Stainless Steel Banding used to secure tracer to piping.

- **T2SSB** (.50" x .020") for 3/8" and 1/2" O.D. tube tracers.
- **T3SSB** (.50" x .030") for 3/4" and 1" O.D. tube tracers and NPS pipe tracers.
- **C001** banding tool for applying tension to T2SSB or T3SSB banding.
