

Release Category: [Minor](#)

Thermon continues to focus on advancing the efficiency of Heat Trace Asset Management by making continuous improvements to the Controls & Monitoring solutions portfolio. As a part of Thermon's Digitization initiative and our commitment to providing great experience to our customers, we release new features/fixes on our products on a regular basis.

We are pleased to announce the release of v2.1.0 software of the Egis Platform (formerly called Genesis Network Software or Genesis Server).

Features

1. **Network Health:** Augmentation of Network Health feature for improved monitoring of Genesis Bridges and controllers in the network.
2. **Alarm Acknowledgement:** Extended alarm acknowledgement support to third-party controller alarms and added bulk acknowledgement capabilities.
3. **User Experience**
 - a. **Notes:** Ability to view notes on the 'Alarms' dashboard as well as the ability to print notes from both the 'Alarms' and 'Circuit' views.
 - b. **Setpoint Values:** Ability to view setpoint values for circuits with alarms on the 'Alarms' dashboard.
 - c. **Graphs:** Added the capability to display alarm event data in graph for improved visibility and analysis.

Resolved Issues

1. **Installation and Setup:** Modification to the setup procedure to eliminate some of the additional manual steps involved during a fresh site installation.
2. **LockOut TagOut (LOTO):** Resolved issues affecting bulk lockout/tagout operations across multiple circuits.
3. **Device management:** Addressed issues related to moving or reassigning bridges, panels, controllers and Genesis Duo.
4. **Alarms:** Fixed issues related to acknowledge action, alarm visibility, and acknowledged state.
5. **Dashboard:** Resolved issues related to filtering and refresh operation.

Recommended Action

We strongly encourage all customers to upgrade to this latest release. Please coordinate with our **Field Services** or **Product Management** teams to facilitate your upgrade.

Need Help?

If you encounter any issues, please [report them here](#).

You can also access the software via [our download portal](#).

Thank you for your continued partnership. If you have any questions or concerns, please [contact us](#).
