

**Release Category:** [Major](#)

Thermon continues to focus on advancing the efficiency of Heat Trace Asset Management by making continuous improvements to the Controls & Monitoring solutions portfolio. As a part of Thermon's Digitization initiative and our commitment to providing great experience to our customers, we release new features/fixes on our products on a regular basis.

We are pleased to announce the launch of the Thermon Egis™ Platform, the new name for our backend software previously referred to as Genesis Network Software or Genesis Server. This major release introduces a completely **redesigned user interface**, delivering significant improvements in overall user experience, site navigation, graphing, and network configuration, along with a **more streamlined installation and upgrade process**.

**What's New?**

**1. Installation Process**

- New installer combines prerequisites and the main application into a single installer package.
- Database migrations now use CREATE OR ALTER to support replicated databases.
- The .NET hosting bundle upgraded from v7 to v8.
- Please refer to the [TEP0286 Egis Installation guide](#) for details.

**2. UI Features**

- Please refer to the [TEP0284 Egis Operating manual](#) for details.

**Recommended Action**

We strongly encourage all customers to upgrade to this latest release. Please coordinate with our **Field Services** or **Product Management** teams to facilitate your upgrade.

**Need Help?**

If you encounter any issues, please [report them here](#).

You can also access the software via [our download portal](#).

Thank you for your continued partnership. If you have any questions or concerns, please [contact us](#).
